

FIND Token - \$FND

Introducing FIND Token (\$FND), an innovative platform offering, FIND.X an Over-the-Counter (OTC) exchange that enables direct asset trading between parties, bypassing centralized exchanges. Trading tokens independently can expose investors to risks like scams, high fees, and limited liquidity. At FIND, our foremost priority is safeguarding investors, ensuring trust, reliability, and peace of mind in every trade.

Commitment to providing a secure and reliable trading platform for its users. A smart contract, bolstered by industry-standard security protocols and transparent, regular audits.

FIND Token isn't Just Another Token, it's the Finder of Tokens

Key Features:

FIND.X: A decentralized application equipped with an Escrow Smart Contract.

★ Here's how it works: When you create an order, your tokens are held safely in the smart contract until the buyer sends the agreed-upon ETH. Once the ETH is received, the tokens are released to the buyer. It's a simple and secure way to trade tokens with peace of mind. **Crowdfill Listings**: Manages substantial token sales in smaller portions, promoting a stable and gradual market growth and engagement. - *Breaking token sales into smaller parts engages the community and attracts new holders. For example, if you hold \$50,000 worth of "Token X" but lack liquidity, you can use our platform to crowdfund your holdings. This approach avoids potential issues like bot interference, ensuring a secure and transparent transaction process.*

Native Team Token Liquidity Management: Ensures market stability by managing team token sales responsibly, maintaining investor confidence. - *This feature creates new fundraising opportunities for token issuers, connecting them with a diverse range of investors eager for promising projects. With FIND.X, token issuers can confidently elevate their projects, supported by a reliable platform that fosters growth and success.*

Privacy Transactions: Offers a secure, private peer-to-peer exchange mechanism through an escrow system, enhancing transaction trust and reliability.

- > **Buyer Perspective**: Alice wants to buy 1000 "Token X" directly from a seller without going through a centralized exchange. She finds a seller, Bob, who has the tokens she wants. Alice and Bob agree on a price and terms for the transaction. Alice then sends the payment to Find Token's escrow smart contract, which locks the funds until Bob confirms the transfer of tokens to Alice.
- > Receiver Perspective: Bob, as the seller, wants to ensure that Alice is a trustworthy buyer before completing the transaction. He uses Find Token's private exchange feature to whitelist Alice, verifying her. Bob then transfers the tokens to Alice, and once Alice confirms receipt, the escrow smart contract releases the locked funds to Bob. This process ensures a secure and transparent transaction between the two parties.

Disclaimer *

Note that certain ERC20 token smart contracts implement a fee-on-transfer (FOT) function which for every token transfer, a percentage of the tokens are burned or distributed to various wallets.

Rewards & Revenue Share Program:

Advantage: Offers token holders a <u>dual</u> passive income stream and strengthens community involvement.

Accrual of Rewards from DEX: Transactions fees on Dex is shared with \$FND holders.

- ➤ **Mechanism**: 2% of each \$FND transaction (purchase and sale) is allocated as **USDC** rewards for all \$FND holders.
- > Purpose: Incentivize holding \$FND and active participation in the token economy.

Revenue Share from FIND.X: Revenue from transaction fees is shared with \$FND holders.

- ➤ **Mechanism**: .25% of each transaction (purchase and sale) is allocated into a pool, 50% of the accrued fees will be shared as revenue share amongst \$FND holders.
- > **Purpose**: Giving investors a sense of ownership and a portion of the revenue, enhancing commitment to the platform's success.

Distribution & Redemption: Rewards are distributed based on token holdings, and holders can easily redeem them within the dashboard, promoting engagement.

- ➤ **Distribution**: Rewards are distributed based on the number of tokens you hold, ensuring a fair distribution among all holders.
- > Redemption: Token holders can easily redeem accrued rewards directly within the dashboard.
- ➤ **Benefit**: Provides a seamless user experience and encourages engagement with the ecosystem.

Overall Impact: The program aims to empower token holders by rewarding loyalty and providing a stake in the platform's success.

Al Trading Bot: Merging advanced Al with secure, transparent trading.

Telegram Integration for Trading: Our bot works smoothly with Telegram, offering an easy-to-use interface for trading. - *It's great for users to find it simple and convenient to trade using Telegram*.

Effortless Trading: Users can set parameters and let the bot handle the rest, eliminating the need to watch charts constantly. - *Saves time and effort, allowing users to engage in other activities while the bot manages their trades efficiently.*

Community Engagement: Users can engage with a community of traders, sharing insights and strategies. - *Our platform fosters a collaborative environment for learning and growth*.

Token Tracker Dashboard: A comprehensive tool providing insights into ERC-20 tokens

Portfolio Management: Our token tracker dashboard simplifies portfolio management, providing tools for performance tracking and insightful reporting. - *This feature is great because it allows users to easily monitor their investments and make informed decisions.*

Market Monitoring: Real-time monitoring of token prices and trading volumes, offering a clear view of market trends and opportunities. - *This feature is great because it helps users make informed decisions and capitalize on market movements*.

Staking Rewards System: Participate in our staking program to earn rewards by locking up your tokens and contributing to the network's security and stability - *Staking helps decentralize the network by incentivizing token holders to actively engage in its governance and security processes.*

Diverse Earning Opportunities: The platform offers a variety of staking pools, catering to different investment strategies and preferences.

Staking: Features innovative staking pairs, including Find Token & Ethereum, providing flexibility and advanced solutions.

Rewards for Participation: Users participating in staking contribute to network security and functionality, earning rewards in the process.

NFT Minting and Market Appeal:

Exclusive NFT Minting: Users can mint unique, high APY NFTs through our staking mechanism, adding a novel aspect to the platform.

Attracting Collectors: This feature not only incentivizes staking but also appeals to NFT enthusiasts, adding diversity to the platform.

Tokenomics:

- 388,000,000 \$FND
- 20% Burned
- Liquidity Locked

Fees: Buy 5% Sell 5%

- 2% Marketing & Development
- 2% Reward DApp
- 1% Liquidity
- 0% Transfer fee
- *.25% Transaction fee on FIND.X

Roadmap Vision:

- 1. **Phase 1**: Concept, community engagement, and website development.
- 2. **Phase 2**: Official launch, intensified marketing strategies, and trading bot integration.
- 3. **Phase 3**: Deployment of testnet for FIND.X and the token tracker dashboard.
- 4. **Phase 4**: Expansion into blockchain multi-bridging and the introduction of a staking platform.
- 5. **Phase 5**: Launch of FIND.X exchange dapp and foray into Gamefi, broadening the platform's scope.

Conclusion: Find Token stands as a beacon of light in Defi, blending the stability of Ethereum's blockchain with cutting-edge features like an OTC exchange, AI trading, NFT minting, and a robust staking ecosystem. It's designed to empower investors, traders, and collectors alike, paving the way for a more secure, efficient, and versatile digital asset experience.

- > Transactions: Reinventing transaction security and trust with the Escrow Smart Contract, ideal for secure, transparent exchanges.
- ➤ Al Integration: Leveraging Al technology for market analysis and trading optimization, accessible via user-friendly Telegram integration
- > Community Engagement: Fostering a collaborative trading environment through social trading features and community interaction.
